

COMPANY PRESENTATION

In its long company history, MEGWARE Computer Vertrieb und Service GmbH has established itself as one of Europe's leading supercomputing specialists. MEGWARE develops, designs, manufactures and markets new-generation supercomputers.

The most diverse sectors and industries rely on MEGWARE's customized concepts to meet their complex computing needs—from research institutes, the automotive industry and universities, to medicine and weather forecasting.

To date, MEGWARE commissioned numerous supercomputers across Europe, several of which have been included in the TOP500 list of the world's most powerful HPC systems.

MEGWARE has implemented advanced ideas and designed products by outstanding in-house hardware and software developments, such as SlideSX[®]LC, the ClustWare[®] cluster management and monitoring tool, and the water-cooled ColdCon[®] HPC system.

Continuously investing in R&D and the collaboration in European committees for the research and further development of high-performance computing allows to set innovative standards.

MEGWARE's high quality standards distinguish not only its products, but also the entire corporate culture. The integrated management system meets highest standards in both quality and environmental protection and is certified by the International Certification Group in accordance with the DIN EN ISO 9001:2015 and 14001:2015 standards.
